Oils, fibers and extracts from red fruits

Crop	Strawberry *Fragaria x ananassa* Blackberry *Rubus fruticosus L.* Black currant *Ribes nigrum L.*
Croppart	Seed Fruit
Application area	Food & feed Fine chemicals Materials
Status	Scale-up stage
Relevant plant compounds	fibers unsaturated fatty acids Vitamins and minerals proteins

Description

Eco Treasures produces fruiticals (oils, seed flours, fibers and extracts) based on vegetal raw materials (mostly red fruit pulp). Each of these products has unique properties and is used in a variety of sectors, including cosmetics, food and food supplements.

Additionaly, the company can supply interested parties with extracts from their own natural raw materials. Thanks to Eco Treasures' expertise and the fact that they have their own installations, they can be a partner in a sustainable, economically viable and environmentally friendly extraction process.

Examples of end products

Seed flour
